

ALL PURPOSE RUBBER DOORS

The Ventech All Purpose Rubber Door is a rugged and durable door suited for applications from light commercial to heavy industrial.

CUSTOM SOLUTIONS

Ventech can custom design this door to suit a variety of applications including corrosion, impact and pressure resistant scenarios.

The operation of this door is by an electric operator that can be mounted in a sprung or spring less configuration. The door is wound to a large barrel in the header assembly where a rubber curtain is wound and unwound to provide a seal. Ventech can design the door's operating conditions to withstand almost any type of environment.

Installation of this door system is quick and easy. With a modular setup, the door can be installed onto any type of supporting wall structure. Due to the durability of the rubber curtain, the door can withstand impacts and continue to function normally after being reset.

FEATURES

- » 2" Water Gauge Pressure Rating (custom available on request)
- » Minimal Maintenance Required
- » High Speed
- » Impact Resistance
- » Custom Sizing

SAFETY FEATURES

- » Safety Compression Edge
- » Photoelectric Sensors
- » Over Current Sensors
- » Light Curtain Sensor
- » Built to Meet Electrical Specifications
- » External Control Panels
