

ROLL UP STYLE DOORS

The Ventech Roll Up Style Ventilation Doors are specifically designed for use in harsh environments with limited serviceability and extended equipment life.

MORE EFFICIENT

Our Roll Up Doors operate more efficiently in scenarios with higher air pressure compared to swing style doors. They can also be adjusted for air circulation in a partially closed or articulating manner.

Extreme wind load and pressures can be handled with ease in production or custom designed models. These doors can be manufactured exactly to customer handling and sizing requirements.

A robust electric drive system allows for minimal unit maintenance and parts that are easily replaceable. This is all accomplished while limiting cycle times to 30 seconds.

FEATURES

- » Standard 20" Water Gauge Pressure Rating
- » Custom Pressure Rating Available on Request
- » Available Angled Installation (0 or 15 degree pitch)
- » Heavy Duty Electric Drive Assembly
- » Interlock Feature with other Ventilation Equipment
- » Emergency Egress Panel Available
- » Custom or Typical Control System Available
- » Overlapping Safety Systems (Safety Edge, Photoelectric Sensor, Motion Sensor, Limit Switches)
- » Mounting to Drift, Bulkhead or Door Frame
- » Ability to Interlock With New or Existing Doors
- » Coating Including Epoxy Painting or Aluminum
- » Frame Anchor Systems to Suit Client Specifications
- » Robust Design to Ensure Longevity
- » Counterbalanced Design Options
- » Custom Colours, Sizing and Power Supply Options
- » Airlock Systems and Integrated Air Regulators
