

# SOLO AND DUAL SWING DOORS

The Ventech Ventilation Doors are specifically designed for use in harsh conditions and in underground environments.

## CUSTOM MANUFACTURED

**Our range of doors are custom manufactured to customer sizing and handling requirements. Ventech manufactures Solo and Dual Drive Doors. The Solo Drive Door utilizes a single actuator while our Dual Drive Doors utilize a dual actuator system.**

Our Solo Drive Door has benefits including operation at pressure equilibrium to cancel the air pressure effect on the panels, single cylinder drive system and rapid open/close cycle times.

Our Dual Drive Door has several benefits over the Solo Drive Door including the reduction in chattering at high pressures, partial opening for smaller vehicles and air to pass through, decreased air leakage, lowered stresses on the door panels, increased cycle times and fewer wear components.

## FEATURES

- » Standard 10" Water Gauge Pressure Rating
- » Custom Pressure Rating Available on Request
- » Available Angled Installation (30 or 60 degree pitch)
- » Upper /Mid/Lower Drive Assembly Mounting
- » Integrated Personnel Door with Interlock Available
- » Decreased Time for Assembly and Efficient Packing
- » Custom or Typical Control System Available
- » Overlapping Safety Systems (Safety Edge, Photoelectric Sensor, Motion Sensor, Limit Switches)
- » Mounting to Drift, Bulkhead or Door Frame
- » Ability to Interlock With New or Existing Doors
- » Coating Including Epoxy Painting or Powder Coating
- » Frame Anchor Systems to Suit Client Specifications
- » Robust Design to Ensure Longevity
- » Simple Component Replacement
- » Custom Colours and Sizing
- » Airlock Systems and Integrated Air Regulators

**Contact Ventech today to find a configuration specific for your site and underground requirements!**
